Market position

Petrovietnam Cà Mau Fertilizer is **one of the leading fertilizer producers in Vietnam**, especially in the urea segment. DCM commands **a dominant market share of approximately 60% in the Mekong Delta –Vietnam's primary agricultural hub—and roughly 30% nationwide**. DCM has established a significant international presence, **aggressively exporting to competitive regional markets** such as Cambodia, South Korea, India, and various countries within the Americas.

Financial performance

During the 2020–2025 period, the company's business performance **experienced significant fluctuations** but generally maintained a **positive long-term recovery trend**. Revenue growth increased from 7.36% in 2020 to 30.53% in 2021 and surged to 61.35% in 2022, reflecting the effectiveness of business expansion activities. However, revenue declined by 21.06% in 2023 due to economic conditions and market pressures before recovering to 7.04% in 2024 and 23.60% in 2025. Net profit after tax followed a similar pattern, rising sharply from VND 662,446 million in 2020 to VND 4,321,081 million in 2022, then falling to VND 1,110,143 million in 2023 before recovering to VND 1,961,838 million in 2025. In addition, **ROEA and ROAA** reached their highest levels in 2022 at 47.73% and 34.20%, respectively, indicating **efficient utilization of equity and assets**. Although these indicators declined in 2023, they gradually improved in the following years. **EPS also increased** significantly from VND 1,249 to VND 8,153 during 2020–2022, then decreased to VND 2,095 before recovering to VND 3,702 in 2025, demonstrating that the company continued to maintain **a relatively strong ability to generate returns** for shareholders.

TIME HORIZON

SUITABLE FOR MEDIUM-TERM INVESTMENT

The fertilizer industry is highly cyclical and strongly influenced by global commodity prices and gas input costs.

2–4 YEARS

Investors may benefit from industry upcycles and improving fertilizer demand, although earnings can fluctuate significantly across different market conditions.

RISK TOLERANCE

MEDIUM RISK TOLERANCE

DCM is supported by a strong financial position, high liquidity, and very low long-term debt. However, the company remains exposed to fluctuations in global fertilizer prices, gas input costs, and weather conditions that may affect agricultural demand. To reduce these risks, DCM applies flexible export strategies and cost management measures to stabilize operations and profitability.

Medium and long-term prospectus

POSITIVE OUTLOOK FOR MEDIUM TO LONG-TERM

Stable Agricultural Demand

Demand for fertilizers is expected to remain stable due to the long-term importance of agriculture and food production in Vietnam and regional markets.

Product Diversification Strategy

DCM is expanding beyond traditional urea products into NPK fertilizers and other agricultural solutions, helping diversify revenue streams and improve competitiveness.

Export and Operational Efficiency Growth

The company is focusing on improving operational efficiency and expanding export activities, which may support long-term profitability and strengthen its market position.
