Market position

CTR is currently **the leading TowerCo company in Vietnam**, operating around 10,000 BTS stations and **ranking among the Top 10 TowerCos in ASEAN**. The company benefits from a comprehensive telecom ecosystem and strong support from Viettel Group – the largest telecom operator in Vietnam. **With the rapid commercialization of 5G and increasing demand for infrastructure sharing, CTR is well-positioned to maintain its market leadership and achieve long-term growth in the telecommunications infrastructure sector.** Beyond telecommunications infrastructure, CTR is actively **expanding into renewable energy systems, smart city infrastructure, and digital construction services**, helping diversify its revenue base and capture opportunities from Vietnam's digital transformation trend. The company has also received multiple recognitions for business efficiency, innovation, and sustainable development, reinforcing its reputation as one of Vietnam's leading infrastructure and technology service providers.

Financial performance

Business model

Viettel Construction operates through a diversified and integrated business model built around five core pillars: **infrastructure leasing, construction, information technology, integrated solutions, and operations & maintenance services.**

RISK TOLERANCE

MEDIUM RISK TOLERANCE

As part of the Viettel Group ecosystem, CTR benefits from strong brand recognition, nationwide network coverage, and stable recurring revenue from infrastructure leasing and technical services.

The company maintains solid financial efficiency with consistent profit growth and benefits from the long-term expansion of 5G infrastructure and BTS leasing demand. However, investors should still consider risks related to slower construction growth, delayed payments from enterprise clients, high capital expenditure requirements, and short-term stock price volatility.

Medium- and Long-Term Outlook Expansion of 5G Infrastructure and Tower Leasing

Viettel Construction is expected to benefit from increasing demand for 5G deployment and telecom infrastructure sharing in Vietnam. The TowerCo segment is likely to remain a key long-term growth driver through stable recurring leasing revenue.

Strong Position within the Viettel Ecosystem

The company's close relationship with Viettel Group provides competitive advantages in securing large-scale infrastructure projects and maintaining stable business expansion opportunities.

Growth from Digital Transformation Trends

In the long run, rising demand for digital connectivity, smart infrastructure, renewable energy systems, and network modernization is expected to support sustainable revenue and profit growth for CTR.

During the 2020–2025 period, Viettel Construction **maintained strong and consistent financial growth**. Revenue increased steadily from 25.83% in 2020 to 10.55% in 2025, **reflecting stable business expansion despite slower growth momentum in later years**.

Earnings After Tax rose continuously from VND 274 billion in 2020 to nearly VND 600 billion in 2025, indicating sustainable profitability and effective operational management. ROEA remained consistently high at around 28%–31% throughout the period, **showing strong efficiency in using shareholders' equity, while ROAA stayed relatively stable near 8%–9%, reflecting efficient asset utilization**. EPS also increased steadily to VND 5,243/share in 2025, highlighting improving shareholder returns and long-term earnings growth.

TIME HORIZON

SUITABLE FOR MEDIUM- TO LONG-TERM INVESTMENT (APPROXIMATELY 2–5 YEARS).

Viettel Construction is more suitable for medium- to long-term investors because its growth strategy depends on long-term infrastructure expansion, tower leasing development, and Vietnam's digital transformation trends. Investors with longer holding periods may benefit from stable cash flows, recurring revenue streams, and the continued expansion of 5G infrastructure demand.
